Summary of findings

Overall summary

Summerfield Care Home is a residential service providing support with personal care for older people. The service is registered to accommodate up to 21 people. At the time of the inspection there were 15 people living there including those living with dementia.

We found the following examples of good practice.

Visitors were checked on arrival for proof of vaccination where it was applicable.

The provider completed regular checks to ensure staff followed effective infection prevention and control practices.

The provider worked with other healthcare professionals to ensure they were following best practice guidance in preventing the spread of infections.

Staff and people were regularly tested and had received COVID-19 vaccinations unless exempt.

The provider ensured PPE supplies were plentiful and accessible throughout the buildings. We saw staff were using PPE appropriately at all times.

The five questions we ask about services and what we found

We always ask the following five questions of services.

Is the service safe?

Further information is in the detailed findings below.

Inspected but not rated

Summerfield Care Home

Detailed findings

Background to this inspection

We carried out this inspection under Section 60 of the Health and Social Care Act 2008 as part of our regulatory functions. This inspection was planned to check whether the provider is meeting the legal requirements and regulations associated with the Health and Social Care Act 2008.

As part of CQC's response to the COVID-19 pandemic we are looking at how services manage infection control and visiting arrangements. This was a targeted inspection looking at the infection prevention and control measures the provider had in place. We also asked the provider about any staffing pressures the service was experiencing and whether this was having an impact on the service.

This inspection took place on 16th February 2022 and was announced. We gave the service 24 hours' notice of the inspection.

Is the service safe?

Our findings

Staffing

- The provider told us they had measures in place to mitigate the risks associated with COVID-19 related staff pressures.

How well are people protected by the prevention and control of infection?

- We were assured that the provider was preventing visitors from catching and spreading infections.
- We were assured that the provider was meeting shielding and social distancing rules.
- We were assured that the provider was admitting people safely to the service.
- We were assured that the provider was using PPE effectively and safely.
- We were assured that the provider was accessing testing for people using the service and staff.
- We were somewhat assured that the provider was promoting safety through the layout and hygiene practices of the premises. However, we saw some radiator covers had started to rust and some handrails had worn sections. These issues had been identified by the registered manager who had included them on their improvement plan. We have signposted the provider to resources to develop their approach.
- We were assured that the provider was making sure infection outbreaks can be effectively prevented or managed.
- We were assured that the provider's infection prevention and control policy was up to date.

Visiting in care homes

- The provider was supporting visits in line with the Governments guidance.

From 11 November 2021 registered persons must make sure all care home workers and other professionals visiting the service are fully vaccinated against COVID-19, unless they have an exemption or there is an emergency.

- The Government has announced its intention to change the legal requirement for vaccination in care homes, but the service was meeting the current requirement to ensure non-exempt staff and visiting professionals were vaccinated against COVID-19.
